Summary

Software Engineering graduate with hands-on experience building and deploying full-stack web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, authentication systems, responsive user interfaces, and database-driven applications. Seeking an internship or Associate Mern Stack developer role to contribute and grow as a full-stack developer.

Projects

LUMÉ – E-Commerce Web Application

Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB

- Built and deployed a full-stack e-commerce platform using React.js, Node.js, Express.js, and MongoDB.
- Implemented JWT-based authentication, bcrypt password hashing, protected routes, and role-based authorization for users and administrators.
- Developed RESTful APIs and backend business logic for product management, shopping cart, checkout, order cancellation, and order status management.
- Designed and debugged client-server workflows, handling validation, authentication state, API errors, and edge cases across the application.

TaskFlow – Task Management Application

Live Demo | GitHub

React.js, Node.js, Express.js, MongoDB

- Developed a full-stack task management application using React.js, Node.js, Express.js, and MongoDB with user authentication and user-specific task data.
- Implemented task creation, editing, deletion, progress tracking, search, and dynamic filtering to manage tasks efficiently.
- Built a responsive interface with Tailwind CSS and added dark mode support to improve usability across devices.

Beautify – Home Beauty Services

Live Demo | GitHub

Final Year Project | Html, Css, Javascript, MySQL, PHP

- Engineered a responsive service booking platform using PHP, MySQL, JavaScript, HTML, and CSS, supporting distinct workflows for clients and administrators.
- Designed a normalized relational database architecture to securely manage user authentication, service catalogs, and dynamic appointment scheduling.
- Developed an administrative dashboard featuring dynamic date-range filtering and SQL aggregate queries to generate accurate operational and financial reports.

Education

Virtual University of Pakistan

Oct. 2022 – Aug. 2026

Bachelor of Science in Software Engineering
Lahore, Pakistan

Punjab Group of Colleges

Sep. 2016 – Apr. 2018

Intermediate in Computer Science
Lahore, Pakistan

Skills

Languages: JavaScript (ES6+), HTML5, CSS3, PHP

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs

Databases: MongoDB, MySQL

Tools & Version Control: Git, GitHub, VS Code.
